Before You Begin

Know Your Purpose:

-If it is to encourage empathy towards and understanding of others, ask players to assume the point of view stated on the card even if (especially if) it is not their own. It's a chance to walk in the shoes of another and discover how you might respond were you faced with the challenge.

-If your goal is to teach others to coach individuals in crisis, you may want to approach the exercise differently. Have participants select Skills & Attitudes that they might suggest for use by the individual in crisis.

-If your mission is crisis prevention, try applying the Skills & Attitudes to the challenges in a proactive manner to see how situations might be preventable.

Such groups might be: healthcare providers and their patients, police officers and immigrants or baby boomers and millennials. Using healthcare for example, bring providers and patients together. Have the providers select challenges from the Healthcare Dilemma deck and patients draw from the Healthcare Professional deck. Have the group pair off (i.e. one healthcare provider and one patient). The pairs are charged with coaching one another to face challenges that may be unfamiliar to them. It is helpful to ask that they assume the point of view on the card in order to encourage empathy and understanding.

Once you know your Purpose and your Participants...begin.

BounceBack is a serious game, a tool that may help build mental toughness by asking people to respond to real world challenges using the Skills & Attitudes of resilience.

The goal is to bring people together to share thoughts and perspectives on how to respond to the many challenges life puts forth. We offer some coaching and game play suggestions, but how you choose to use these cards is really up to you.

Know your Participants:

-Are you coaching an individual in transition? Is the transition specific to a particular issue such as Divorce/Finance or Disability? Select and use those decks that best relate to the transition/s being experienced.

-Are the participants looking to build a broader sense of resilience Skills & Attitudes that relate to their particular vocation? Select from our bundles or choose individual decks that relate best to the needs of the group you are working with.

-Do you have populations that could build resilience through a better understanding of the challenges faced by each?

The Basic Concept:

You're presented with a Challenge Card. Spread the ten Skills & Attitudes cards out so that they can be seen. Read the challenge on the face of your card. Using the ten cards in front of you, select the cards having the Skills & Attitudes you wish to apply in order to manage the challenge at hand. Turn over your Challenge card to see the Skills & Attitudes (indicated by a red* asterisk) that we suggest might be most helpful in managing the situation. Repeat this process, in turn, for each participant. And please, don't forget the discussion. Adapt this basic concept as you will to fit the needs of you and/or your participants.

BounceBack was developed as a tool to practice responding to life's challenges. Challenges are presented and the user chooses skills and attitudes that he or she wishes to apply in order to respond to that challenge. It's very simple. It's practice. With >36 decks and >720 challenge questions, it's a lot of practice.

-Post-secondary education has many advantages. Many flourish in this new and unique environment. Others feel stressed in the absence of an established support system, experience anxiety related to the need to make critical decisions (independently and almost daily) that will impact ones success, and become exhausted by the academic demands. Being prepared academically is not always enough. Students must be prepared for the entire college experience.

-This deck was created to address this need. To assist students to prepare for and respond to the challenges of college life. Use it alone to become aware of and begin learning the Skills & Attitudes that may prepare you for the transition. Use it in small groups in the dorm to start conversations and connect with others who might be struggling. Campus counseling centers could use It to help coach students to build resilience and move past the obstacles to their education.

More than Homesick

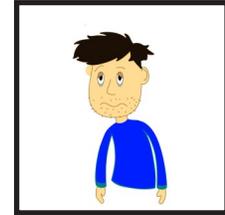

I can't sleep. I haven't been able to since I arrived. The dorm is loud, but noise has never bothered me before. I don't have much of an appetite either. Food has always been my friend. I don't get it. I just feel unsettled all the time. I don't like the way I'm feeling.

More than Homesick

I'm not myself. I barely get through the demands of the day. I just want to go to bed and pull the covers over my head. I don't think I have it in me. I thought about going to the counseling center. John went and was sent home on medical leave. John was the only one I could talk to about this.

More than Homesick

Free booze and parties everywhere! It's awesome, but getting up the morning after...not so much. I've had a couple of blackouts. My friends filled me in once. The second time I watched a YouTube clip circulating on campus. My grades are suffering, but I need this. I've never been welcomed like this anywhere. I need the full college experience!

Bounce BACK

10 Skills and Attitudes:

- * Connect/Communicate with Others
 - Be Flexible
 - * Problem Solve
- * Manage Strong Feelings
 - Self Confidence
- Find the purpose/meaning in life
 - See the Big Picture
