Before You Begin

Know Your Purpose:

-If it is to encourage empathy towards and understanding of others, ask players to assume the point of view stated on the card even if (especially if) it is not their own. It's a chance to walk in the shoes of another and discover how you might respond were you faced with the challenge.

-If your goal is to teach others to coach individuals in crisis, you may want to approach the exercise differently. Have participants select Skills & Attitudes that they might suggest for use by the individual in crisis.

-If your mission is crisis prevention, try applying the Skills & Attitudes to the challenges in a proactive manner to see how situations might be preventable.

Such groups might be: healthcare providers and their patients, police officers and immigrants or baby boomers and millennials. Using healthcare for example, bring providers and patients together. Have the providers select challenges from the Healthcare Dilemma deck and patients draw from the Healthcare Professional deck. Have the group pair off (i.e. one healthcare provider and one patient). The pairs are charged with coaching one another to face challenges that may be unfamiliar to them. It is helpful to ask that they assume the point of view on the card in order to encourage empathy and understanding.

Once you know your Purpose and your Participants...begin.

BounceBack is a serious game, a tool that may help build mental toughness by asking people to respond to real world challenges using the Skills & Attitudes of resilience.

The goal is to bring people together to share thoughts and perspectives on how to respond to the many challenges life puts forth. We offer some coaching and game play suggestions, but how you choose to use these cards is really up to you.

Know your Participants:

-Are you coaching an individual in transition? Is the transition specific to a particular issue such as Divorce/Finance or Disability? Select and use those decks that best relate to the transition/s being experienced.

-Are the participants looking to build a broader sense of resilience Skills & Attitudes that relate to their particular vocation? Select from our bundles or choose individual decks that relate best to the needs of the group you are working with.

-Do you have populations that could build resilience through a better understanding of the challenges faced by each?

The Basic Concept:

You're presented with a Challenge Card. Spread the ten Skills & Attitudes cards out so that they can be seen. Read the challenge on the face of your card. Using the ten cards in front of you, select the cards having the Skills & Attitudes you wish to apply in order to manage the challenge at hand. Turn over your Challenge card to see the Skills & Attitudes (indicated by a red* asterisk) that we suggest might be most helpful in managing the situation. Repeat this process, in turn, for each participant. And please, don't forget the discussion. Adapt this basic concept as you will to fit the needs of you and/or your participants.

BounceBack was developed as a tool to practice responding to life's challenges. Challenges are presented and the user chooses skills and attitudes that he or she wishes to apply in order to respond to that challenge. It's very simple. It's practice. With >36 decks and >720 challenge questions, it's a lot of practice.

-According to a recent McKinsey Global Institute report, "Our scenarios suggest that half of today's work activities could be automated by 2055, but this could happen up to 20 years earlier or later depending on various factors, in addition to other economic conditions." We're already seeing signs of disappearing tasks once completed by human hands. The fact of the matter is that machines and 'bots' can do some things faster, more efficiently and more consistently than we can. As much as this may sting our egos, to remain resilient we must take a long and serious look at our future role in the workforce.

-Life is full of twists, turns and shifts. Work is no less subject to these patterns than our everyday lives. Nothing lasts forever. We must understand this and learn to think optimistically and in different ways in order to respond with resilience to the impact that automation brings.

-This deck was created to encourage thought and discussion regarding our changing menu of occupations. Share it with your children to get them thinking about vocational choices. Use it with students to practice applying the Skills & Attitudes of resilience in order to problem solve and get them thinking about building a resilient workforce. Use them in your place of business to introduce automation and provide employees with the skills and attitudes to manage the emotional and financial impact of automation. Play a game with friends to stimulate creative discussion.

Occupational Hazard

On the whole, manufacturing jobs haven't been promising for some time. But I chose a manufacturing job involving technology. This seemed a good bet and I planned to retire from this industry. A notice went out yesterday about a plant upgrade involving robots. What???

Occupational Hazard

I've been reading about wave energy. I live on the Maine coast and have seen how powerful waves can be. It feels as if this could be a promising occupation to look into, but what about the beauty of the coastline. Do I really want to be responsible for interfering with that?

Occupational Hazard

I've always been able to supplement my income by working as a server in local restaurants. When I last traveled, I ate in three restaurants having touch screens at the tables; eliminating the need for a server and a tip.

Bounce BACK

10 Skills and Attitudes:

- *Connect/Communicate with Others
 - *Be Flexible
 - *Problem Solve
 - Manage Strong Feelings
 - Self-Confidence
- Find the purpose/meaning in life
 - *See the Big Picture
- Appreciate and use humor
