Before You Begin

Know Your Purpose:

-If it is to encourage empathy towards and understanding of others, ask players to assume the point of view stated on the card even if (especially if) it is not their own. It's a chance to walk in the shoes of another and discover how you might respond were you faced with the challenge.

-If your goal is to teach others to coach individuals in crisis, you may want to approach the exercise differently. Have participants select Skills & Attitudes that they might suggest for use by the individual in crisis.

-If your mission is crisis prevention, try applying the Skills & Attitudes to the challenges in a proactive manner to see how situations might be preventable.

Such groups might be: healthcare providers and their patients, police officers and immigrants or baby boomers and millennials. Using healthcare for example, bring providers and patients together. Have the providers select challenges from the Healthcare Dilemma deck and patients draw from the Healthcare Professional deck. Have the group pair off (i.e. one healthcare provider and one patient). The pairs are charged with coaching one another to face challenges that may be unfamiliar to them. It is helpful to ask that they assume the point of view on the card in order to encourage empathy and understanding.

Once you know your Purpose and your Participants...begin.

BounceBack is a serious game, a tool that may help build mental toughness by asking people to respond to real world challenges using the Skills & Attitudes of resilience.

The goal is to bring people together to share thoughts and perspectives on how to respond to the many challenges life puts forth. We offer some coaching and game play suggestions, but how you choose to use these cards is really up to you.

Know your Participants:

-Are you coaching an individual in transition? Is the transition specific to a particular issue such as Divorce/Finance or Disability? Select and use those decks that best relate to the transition/s being experienced.

-Are the participants looking to build a broader sense of resilience Skills & Attitudes that relate to their particular vocation? Select from our bundles or choose individual decks that relate best to the needs of the group you are working with.

-Do you have populations that could build resilience through a better understanding of the challenges faced by each?

The Basic Concept:

You're presented with a Challenge Card. Spread the ten Skills & Attitudes cards out so that they can be seen. Read the challenge on the face of your card. Using the ten cards in front of you, select the cards having the Skills & Attitudes you wish to apply in order to manage the challenge at hand. Turn over your Challenge card to see the Skills & Attitudes (indicated by a red* asterisk) that we suggest might be most helpful in managing the situation. Repeat this process, in turn, for each participant. And please, don't forget the discussion. Adapt this basic concept as you will to fit the needs of you and/or your participants.

BounceBack was developed as a tool to practice responding to life's challenges. Challenges are presented and the user chooses skills and attitudes that he or she wishes to apply in order to respond to that challenge. It's very simple. It's practice. With >36 decks and >720 challenge questions, it's a lot of practice.

-Beyond our circle of family and friends, we are all part of a larger community. Our neighborhoods may house people we may be unfamiliar with and/or with whom we have dissimilar beliefs. Decision-making in the best interest of the community is always challenging. But coexist we must. Challenges likely to impact the community are best dealt with by connecting, communicating and problem solving.

-Resilient Communities was created for use with community members (both young and old) to stimulate conversation and practice responding to some of the 21st century challenges we face. This deck is intended for use in groups where practice applying the Skills & Attitudes of resilience may lead to a stronger sense of community and a more resilient response to the challenges that lay ahead.

Resilient Communities

An old truss bridge through the city collapsed when an oversized truck load clipped a overhead, steel girder. Ten, who lived in a homeless encampment below, were killed and 2 others injured.

Resilient Communities

People are always saying, 'Thank you for your service.' I know they mean well and I appreciate it. But what I really need is for them to take an interest in what we veterans live with after the war is over. It's hard stuff...I know.

Resilient Communities

While waiting in the office to pay my rent, a man bursts through the door carrying a small jar in his hands. Moving immediately to the desk, he begins yelling at the housing clerk, "You said you were going to take care of this! My son is no longer allowed to visit me and it's your fault!" The lid comes off the jar and with one wave of his arm, he spreads what looks like hundreds of bedbugs throughout the office.

10 Skills and Attitudes:

- * Connect/Communicate with Others
- Be Flexible
- * Problem Solve
- Manage Strong Feelings
- Self Confidence
- Find the purpose/meaning in life
- * See the Big Picture
- Appreciate and use humor
